Forecast for Monday 29 May 2023

Weather: The fine and dry weather is set to continue, once any isolated patches of cloud across the slopes clear as the sun rises. Clear skies through the morning though perhaps turning somewhat hazier in the afternoon as high cloud builds. This cloud will remain above all summits, so it will still be bright with prolonged sunshine. Slightly cooler temperatures compared to Sunday, and a breezier day, so perhaps not feeling as warm as the weekend, especially in exposed regions.

Chance of cloud-free hill tops above 600m: Greater than 95%.

Low cloud and visibility: Perhaps some cloud across slopes during the early hours of the morning, but this lifting and dissipating quickly as the sun rises, then cloud is expected to remain above all summits for the rest of the day. Very good visibility with excellent air clarity allowing distant hills and landmarks to be clearly visible.

Meteorologist's View

It will feel very warm in the sunshine, despite the slightly breezier conditions. High or very high UV levels can damage your skin, so remember your sun protection such as sunglasses and a hat, and stay hydrated by taking plenty of water.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Tuesday 30 May 2023

Weather: A risk of some spots of cloud across slopes once again through the early hours, this once again lifting and breaking quickly, leaving another fine and dry day with plenty of sunshine. Feeling slightly warmer than Monday.

Maximum wind: East north-easterly winds 15-20mph, gusting 25-30mph.

Chance of cloud-free hill tops above 600m: >95%.

Low cloud and visibility: Cloud will remain above all summits. Excellent visibilities.

Temperature: **Valleys:** Plus 5 Celsius rising to plus 21 Celsius.
At 600m: Plus 4 Celsius rising to plus 12 Celsius.
Freezing level: Well above summits.
